

Dear Students,

We have exciting news for you,
our Supply Chain Management Trainee Program is here!

Through the program you will have the opportunity to learn about one of the most advanced supply chains in the market, that of Coca-Cola 3E, and embark on an expertise path, such as **Logistics, Manufacturing, Continuous Improvement & Digital Transformation, and Maintenance & Automation**. Each expertise path is a well-structured and intensive training program tailored to provide you with hands-on experience across different streams of the vast Coca-Cola 3E supply chain. This program is a unique opportunity to learn from industry experts, develop a profound understanding of our operations, and contribute to meaningful projects that impact our business on a global scale.

Logistics

Focus on managing complex logistics operations, improving efficiency, reducing costs, and enhancing customer satisfaction. Logistics requires attention to detail, communication skills, time management, problem-solving skills, adaptability, data analysis and leading teams effectively, building relationships with stakeholders, and collaborating with other departments to achieve common goals.

Manufacturing

Focus on planning, organizing and delivering the activity of various Production Departments, in order to fulfill the production plan at a high-quality level and optimum costs, according to Company standards. Highlight on compliance with procedures and regulatory requirements related to quality systems as well as on the corrective and preventive maintenance activities.

Continuous Improvement & Digital Transformation

Focus on Lean Processes in Manufacturing, deployment of all Lean Manufacturing solutions - including implementation, tracking and sustainable use within the plant. Supporting the advanced management of digital tools and for delivering Supply Chain Academy training tasks and successful practices sharing and continuous improvement initiatives.

Maintenance & Automation

Focusing on optimum performance of the Low-Level Automation systems, execution of automation projects regarding energy/water usage optimization, production lines efficiency and utilities performance optimization. Maintenance and development of Industry 4.0 systems, predictive maintenance and energy management.

If you believe that this program is the right opportunity for you to follow your passion and start your career in SC Management in the leading FMCG company in Greece, apply now and become a part of our passionate and dynamic team.
